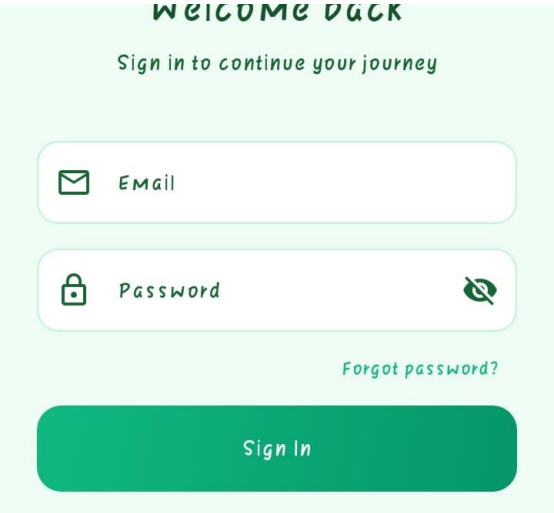
Image, Icons and FormFields

Icon & TextField:

```
Widget _buildField({
  required TextEditingController controller,
  required String label,
  required IconData icon,
  required dynamic theme,
  TextInputType? keyboardType,
  bool obscure = false,
  Widget? suffix,
}) {
  return TextField(
    controller: controller,
    keyboardType: keyboardType,
    obscureText: obscure,
    style: TextStyle(color: theme.text),
    decoration: InputDecoration(
      labelText: label,
      labelStyle: TextStyle(color: theme.textMuted),
      prefixIcon: Icon(icon, color: theme.textMuted),
      suffixIcon: suffix,
      filled: true,
      fillColor: theme.card,
      border: OutlineInputBorder(
        borderRadius: BorderRadius.circular(14),
        borderSide: BorderSide(color: theme.border),
      ),
      enabledBorder: OutlineInputBorder(
        borderRadius: BorderRadius.circular(14),
        borderSide: BorderSide(color: theme.border),
      ),
      focusedBorder: OutlineInputBorder(
        borderRadius: BorderRadius.circular(14),
        borderSide: BorderSide(color: theme.accent, width: 2),
      ),
    ),
  );
}
```



Login Screen Sign-in form and icons:

• Location: Lib/screens/auth/login_screen.dart

• Email and Password Icons

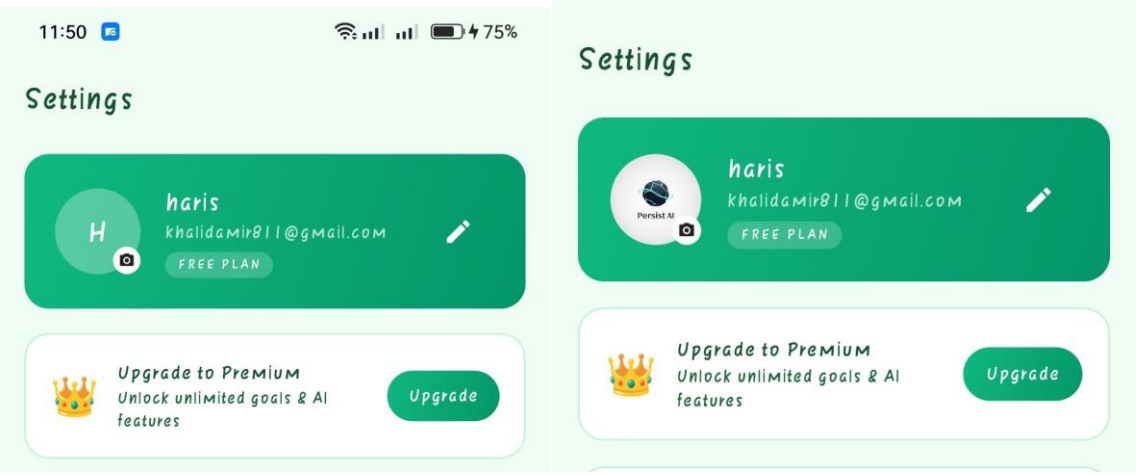
• Form to fill email and password

Images:

```
GestureDetector(
  onTap: _showUploadDialog,
  onLongPress: _showUploadDialog,
  child: Stack(
    children: [
      CircleAvatar(
        radius: 28,
        backgroundColor: Colors.white.withValues(alpha: 0.3),
        backgroundImage: _localImage != null
            ? FileImage(_localImage!) as ImageProvider
            : (photoUrl != null ? NetworkImage(photoUrl) : null),
        child: (_localImage == null && photoUrl == null)
            ? Text(
                initials,
                style: const TextStyle(
                  color: Colors.white,
                  fontSize: 20,
                  fontWeight: FontWeight.bold,
                ),
              )
            : null,
      ),
      Positioned(
        bottom: 0,
        right: 0,
        child: Container(
          width: 18,
          height: 18,
          decoration: const BoxDecoration(
            color: Colors.white,
            shape: BoxShape.circle,
          ),
          child: const Icon(Icons.camera_alt, size: 11, color: Colors.black87),
```

```
          ),
          child: const Icon(Icons.camera_alt, size: 11, color: Colors.black87),
        ),
      ),
    ],
  ),
),
```

```
Future<void> _pickImage() async {
  final picker = ImagePicker();
  final picked = await picker.pickImage(source: ImageSource.gallery, imageQuality: 80);
  if (picked == null) return;
  final prefs = await SharedPreferences.getInstance();
  await prefs.setString('profile_image_path', picked.path);
  setState(() => _localImage = File(picked.path));
}
```

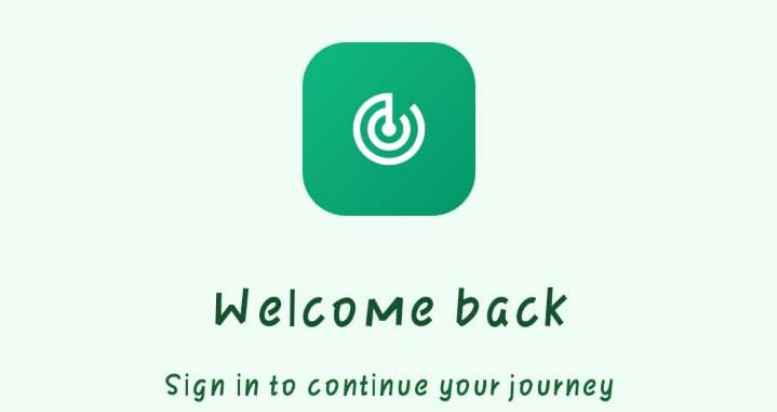


Settings screen

- top profile card shows a **circular photo** of the user.
- If they picked a photo from gallery it shows that (FileImage).
- If logged in with Google it shows their Google profile photo (NetworkImage).
- If neither, shows text initials. A small **camera icon badge** sits at bottom-right of the circle.

Icon:

```
// Logo
Center(
  child: Container(
    width: 80,
    height: 80,
    decoration: BoxDecoration(
      gradient: theme.linearGradient,
      borderRadius: BorderRadius.circular(20),
    ),
    child: const Icon(Icons.track_changes, color: Colors.white, size: 40),
  ),
),
```



Login screen

- app logo
- shows a **large gradient rounded square** with a white target/track icon in the center
