LAB 9

TabBar, TabBarView, Drawer, ListView

1. TABBAR + TABBARVIEW:

Insight_screen

TabController Setup:

```
class _InsightsScreenState extends State<InsightsScreen>
    with SingleTickerProviderStateMixin {
  late TabController _tabController;
  double _skipProb = 0.0;
  double _avgMood = 2.0;
  List<double> _moodTrend = [];
  List<AppUsageEntry> _appUsage = [];
  bool _loading = true;

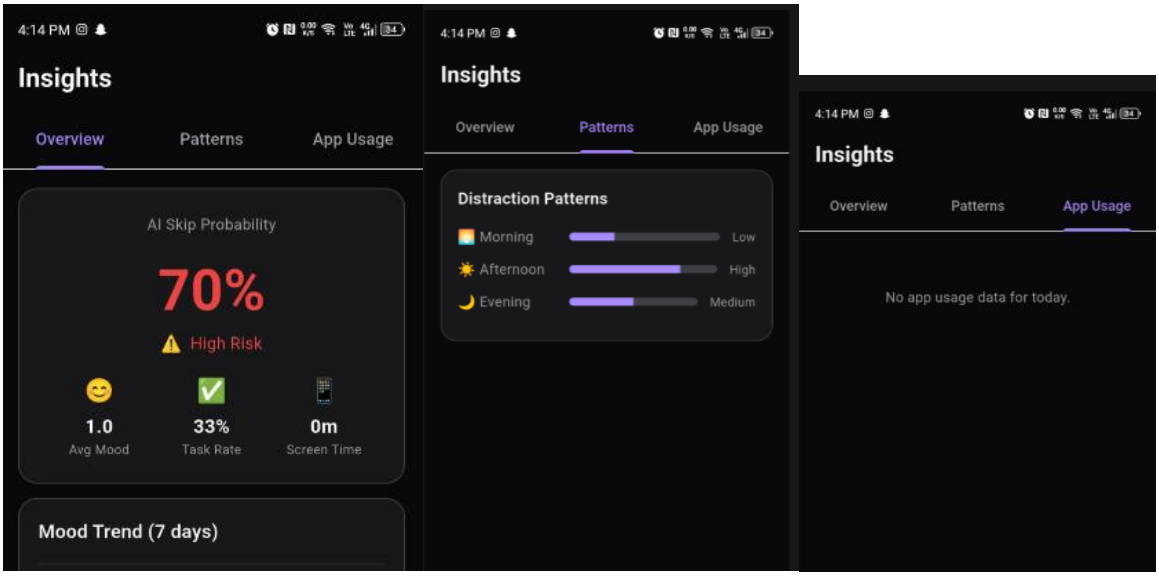
  @override
  void initState() {
    super.initState();
    _tabController = TabController(length: 3, vsync: this);
    _loadData();
  }
```

TabBar

```
      bottom: TabBar(
        controller: _tabController,
        indicatorColor: theme.accent,
        labelColor: theme.accent,
        unselectedLabelColor: theme.textMuted,
        indicatorWeight: 3,
        tabs: const [
          Tab(text: 'Overview'),
          Tab(text: 'Patterns'),
          Tab(text: 'App Usage'),
        ],
      ),
```

TabBarView (3 tabs)

```
135            body: TabBarView(
136              controller: _tabController,
137              children: [
138
139                // — TAB 1: Overview ————————————————————————
140 >              RefreshIndicator(···
230                ),
231
232                // — TAB 2: Patterns ————————————————————————
233 >              ListView(···
280                ),
281
282                // — TAB 3: App Usage ———————————————————————
283 >              ListView(···
326                ),
327
328              ],
329            ),
```



Tab Bar + View:

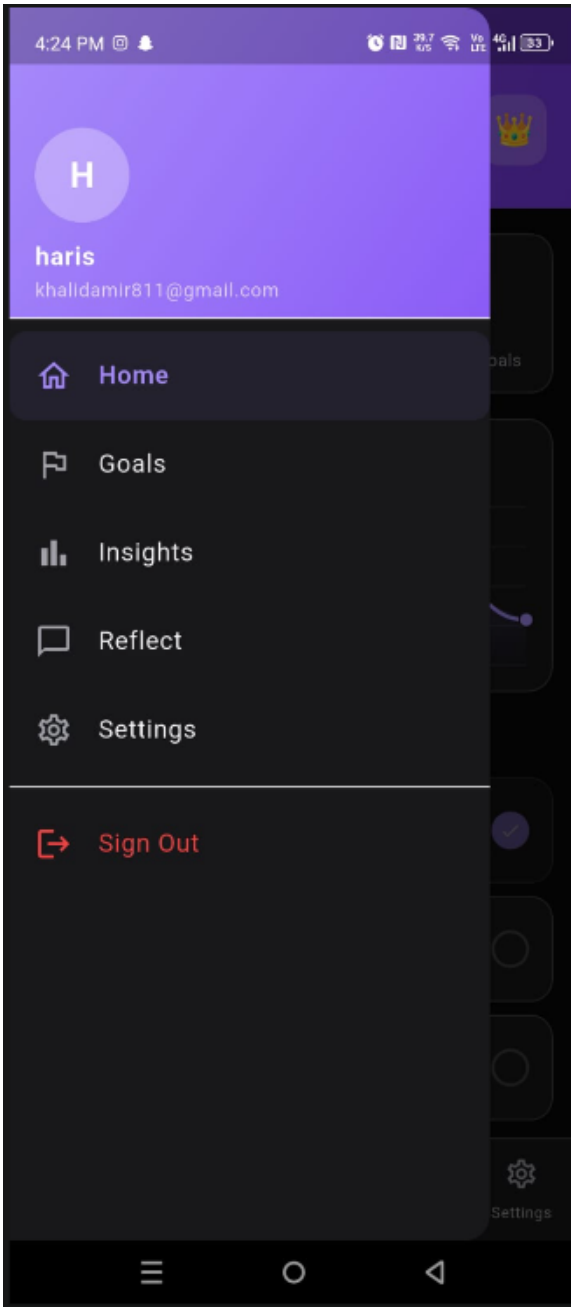
- Insights screen has 3 swipeable tabs at the top.
- "Overview" shows AI skip % + mood chart.
- "Patterns" shows morning/afternoon/evening distraction bars.
- "App Usage" shows phone screen time.
- Tabs have accent underline indicator and animate on switch.

2. DRAWER + LISTVIEW

Main_screen

```
DrawerHeader(
  decoration: BoxDecoration(gradient: theme.linearGradient),
  child: Column(
    crossAxisAlignment: CrossAxisAlignment.start,
    mainAxisAlignment: MainAxisAlignment.end,
    children: [
      CircleAvatar(
        radius: 30,
        backgroundColor: Colors.white.withValues(alpha: 0.3),
        backgroundImage: photoUrl != null ? NetworkImage
        (photoUrl) : null,
        child: photoUrl == null
            ? Text(initials, style: const TextStyle(color:
            Colors.white, fontSize: 22, fontWeight: FontWeight.
            bold))
            : null,
      ),
      const SizedBox(height: 10),
      Text(name, style: const TextStyle(color: Colors.white,
      fontSize: 16, fontWeight: FontWeight.bold)),
      Text(email, style: const TextStyle(color: Colors.white70,
      fontSize: 12)),
    ],
  ),
),
```

```
49      return Scaffold(
50        drawer: Drawer(
51          backgroundColor: theme.card,
52          child: ListView(
53            padding: EdgeInsets.zero,
54            children: [
55              // Drawer Header
56 >            DrawerHeader(···
75              ),
76              // Nav items
77              ...[
78                (Icons.home_outlined,      'Home',     0),
79                (Icons.flag_outlined,      'Goals',    1),
80                (Icons.bar_chart_outlined, 'Insights', 2),
81                (Icons.chat_bubble_outline,'Reflect',  3),
82                (Icons.settings_outlined,  'Settings', 4),
83              ].map((item) => ListTile(
84                leading: Icon(item.$1, color: _currentIndex == item.$3 ?
                  theme.accent : theme.textMuted),
85                title: Text(item.$2,
86                    style: TextStyle(
87                      color: _currentIndex == item.$3 ? theme.accent : theme.
                        text,
88                      fontWeight: _currentIndex == item.$3 ? FontWeight.w600
                        : FontWeight.normal,
89                    )),
90                selected: _currentIndex == item.$3,
91                selectedTileColor: theme.accent.withValues(alpha: 0.08),
92                shape: RoundedRectangleBorder(borderRadius: BorderRadius.
                  circular(10)),
93                onTap: () {
94                  setState(() => _currentIndex = item.$3);
95                  Navigator.pop(context);
96                },
97              )),
98              const Divider(),
99              ListTile(
100               leading: Icon(Icons.logout, color: theme.danger),
101               title: Text('Sign Out', style: TextStyle(color: theme.
                  danger)),
102               onTap: () {
103                 Navigator.pop(context);
104                 context.read<GoalsProvider>().clear();
105                 context.read<AuthProvider>().logout();
106               },
107             ),
108           ],
109         ),
110       ),
```



Drawer + ListView:

- Swipe right from left edge drawer slides in from left.
- Shows gradient header with profile photo + name + email.
- screen is highlighted with accent color.
- Bottom has a red Sign Out option.
- Tapping any item navigates to that screen and closes the drawer
